

I am new to xm radio and must say with all the driving i do it makes my day. With driving over 2500 miles a month in the state of fl xm makes my life easier with being able to get up to the min info on traffic and weather where i am. with no hassel in getting the info i bleave it makes me a safer driver on the road because i don't have to search for stations while driving. if you allow the nab to win in this issue. it would be a negative impact on myself and all that depend on this service witch we pay for by the way. thanks in advance for taking the time to listen to me
